Lyme Computer Teams with immixGroup, Inc. for GSA Sales of Cisco Products

Lyme, NH, August 21, 2008 – Lyme Computer Systems, a Cisco Premier Partner and a full-service computer products reseller with a focus on networking, computer forensics, computer software, networking security and interconnectivity, today announced a new GSA Teaming Agreement with immixGroup, Inc. for the sale of Cisco Systems products to the Federal Government.

immixGroup announced the new program on August 13th, after a lengthy negotiation with the GSA and Cisco. Under this new program, Lyme was chosen as one of the first teaming partners by Cisco, because of our previous GSA schedule sales experience with Cisco, and our longstanding relationship with Ingram Micro, the outsourced distribution partner chosen by immixGroup.

“As a longtime Cisco Premier Partner, we are extremely pleased to be able to team with immixGroup for GSA Schedule sales of Cisco products. We were already working with immixGroup in support of several other manufacturers and contract opportunities, so the decision for Lyme to join their new program was an easy one. We are excited about the straightforward mechanization of this contract through our major distribution partner, Ingram Micro as well.” stated Marc Fertik, Executive Vice President and Chief Operating Officer of Lyme Computer Systems.

About Lyme Computer Systems

Lyme Computer Systems established in 1983, is recognized as a premier IT solutions provider in the government and commercial markets by providing an unsurpassed mix of customer service and high quality products at the most competitive prices.
